

Introduction to AdminStudio

24th July 2025

Raheel Aslam -

Agenda

1. Introduction
2. Main Challenges
3. AdminStudio Technology Operation
4. Q&A

My Areas of Expertise

- Application Packaging and Deployment
- Software Lifecycle Data Management
- Software Vulnerability and Patch Management
- SME for Flexera tools for delivery

Raheel Aslam
Principal Solution Engineer
Flexera

Main Challenges That Enterprises Are Up Against

Business Continuity

Why it matters:

If an application fails at go-live, it can disrupt core business processes, halt services, or cause operational outages.

Potential impact:

Revenue loss, missed SLAs, operational downtime.

Vulnerabilities/EOL

Why it matters:

Applications that aren't hardened for security may be exposed to data breaches, malware, or insider threats.

Potential impact:

Customer data leaks, legal liability, brand damage, and financial penalties.

Compliance Regulatory Risk

Why it matters:

If the application processes or stores regulated data (e.g., PII, health records), it must comply with standards like GDPR, HIPAA, or PCI-DORA, DSS.

Potential impact:

Heavy fines, legal action, and audit failure.

Budget Overruns & Cost Risk

Why it matters:

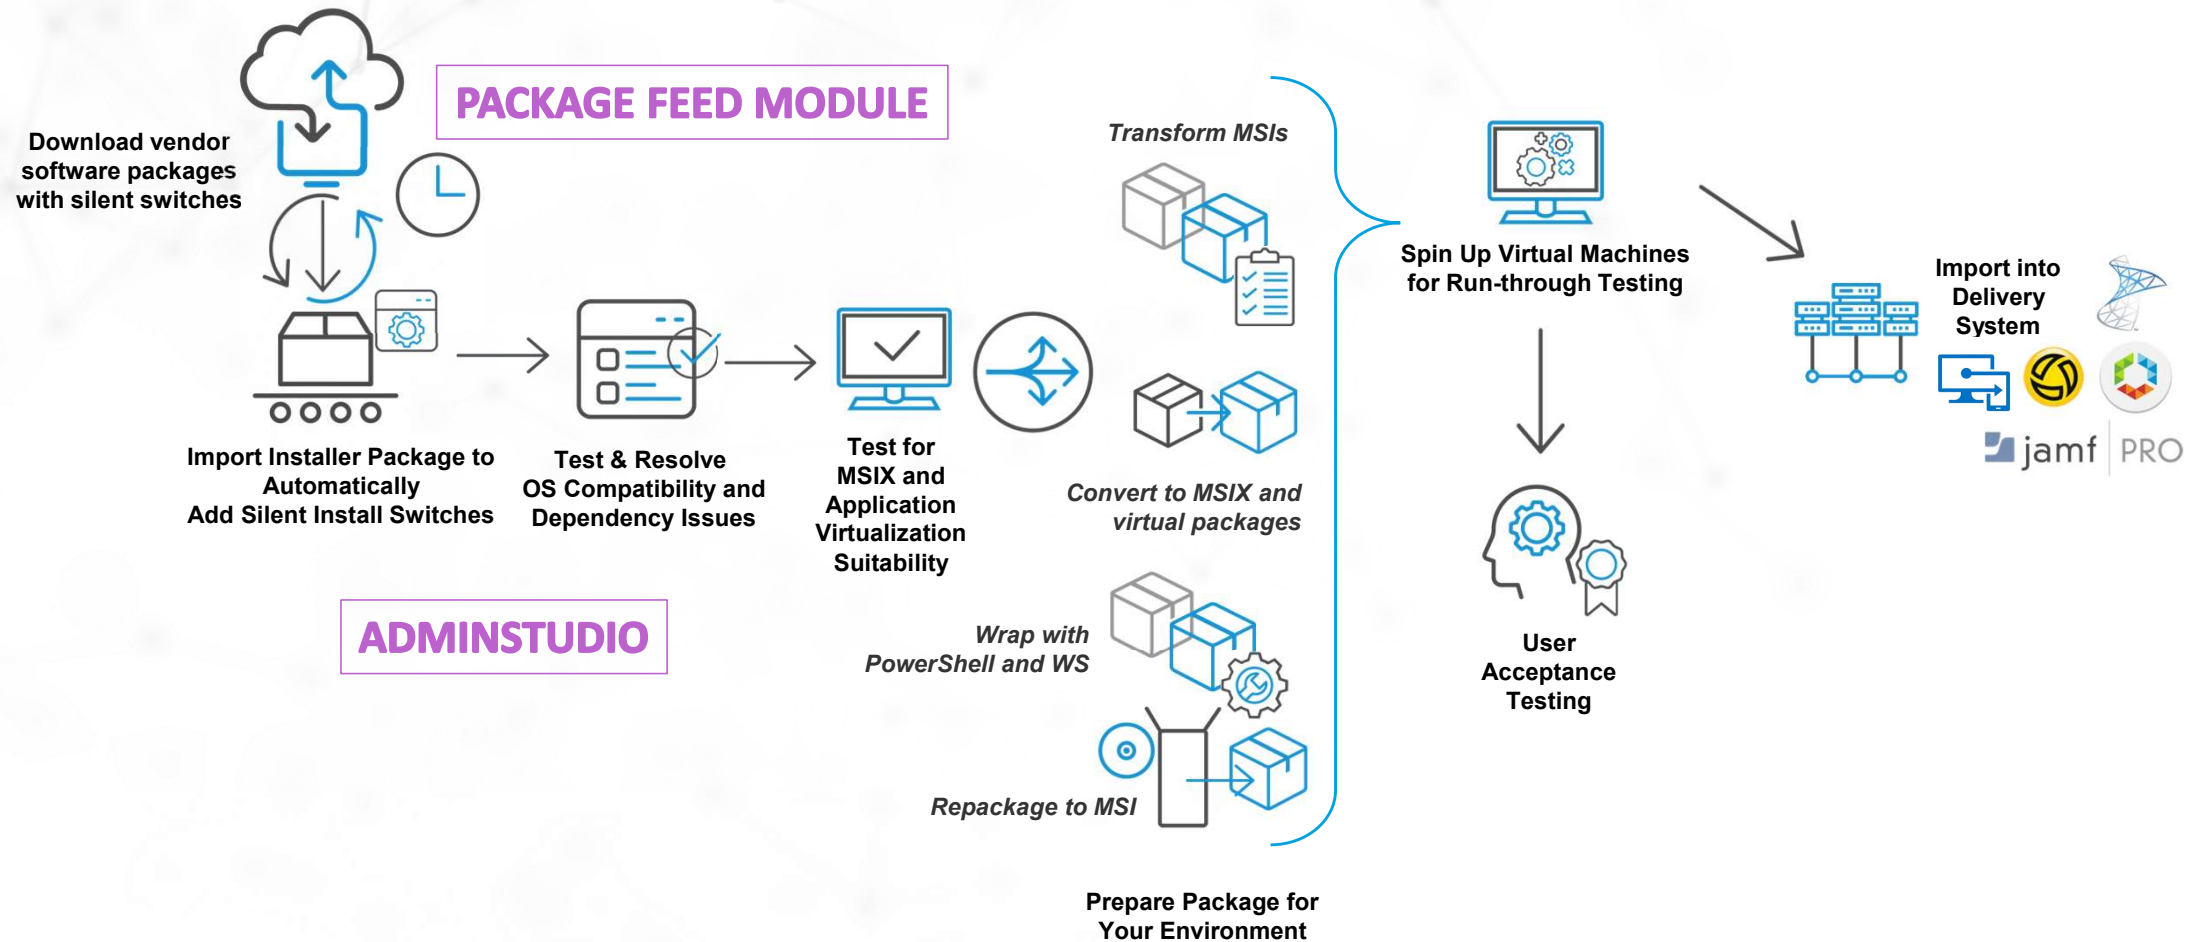

Scope creep or hidden tech debt.

Win 10 to 11 Migration
Config Manager to Intune
package Migration

Potential impact:

Project overruns, cost, ROI.

Technology Operations: Application Readiness Process
